jaryn2.github.io | github.com/Jaryn2

## EDUCATION

---

### University of Southern Indiana

Computer Science, Software Engineering focus

Expected December 2027

### Purdue University

Previously attended

August 2023 - May 2025

## PROJECT

---

### FiberScout | Housing and Broadband Research

September 2026

- Built a research app combining Census and FCC data for 190 Ventura County census tracts, with maps, comparisons, scenario calculations, and PDF/CSV exports.
- Added a C#/ASP.NET Core API for accounts and saved scenarios, with PostgreSQL revision history, duplicate-request handling, and edit-conflict checks.
- Created Python data pipelines and SQL/PostGIS queries to validate records, handle repeated reports, and retain source dates.
- Configured GitHub Actions to run 97 automated tests across Python, TypeScript, and C#, plus a production web build.

Published research demo; the account backend runs locally.

## PROJECT TECHNOLOGIES

---

**Languages:** TypeScript, Python, C#, SQL, HTML, CSS

**Frameworks and data:** React, Next.js, ASP.NET Core, PostgreSQL, PostGIS

**Development tools:** Git, GitHub Actions, Docker

## WORK EXPERIENCE

---

### Frito-Lay | Product Handler

February 2026 - July 2026

- Picked boxes from warehouse aisles and loaded carts.

### The Servants Inc. | Factory Float

June 2024 - December 2025

- Helped with factory tasks wherever additional support was needed.

## ATHLETICS

---

### Former student-athlete, track and cross country

Competed at Purdue's main campus from August 2023 to May 2025 and at the University of Southern Indiana for one semester.
